THE AI MONEY PROMPT PACK

30 copy-paste prompts that do the work
of a ₦100,000 personal assistant

Open ChatGPT or Claude. Copy a prompt. Replace the [BRACKETS]
with your details. Watch it work.

From Bambi - The AI Life Upgrade

Read this first (60 seconds)

1. Replace every [BRACKET]

The brackets are where YOUR situation goes. A prompt with real details about you beats a generic one every single time.

2. Never accept the first draft

The first answer is the beginning of a conversation. Reply with "make it punchier", "use simpler words", "the second point is weak - replace it". Three rounds in, the result is 10x better.

3. Give context like you are briefing a new staff member

The AI knows nothing about you until you tell it. Your business, your audience, your budget, your goal - the more you share, the sharper the answer.

4. Save your winners

When a prompt gives you gold, save your customized version in your notes. That file becomes your personal money toolkit.

THE GOLDEN RULE

AI is not a search engine. It is a brilliant employee on their first day - extremely capable, but it needs a proper brief. These 30 prompts ARE the proper briefs.

MAKE MONEY THIS WEEK

Prompts 1-5 - Finding income, winning clients, closing deals

1 - The Skill-to-Income Finder

You are a career strategist who knows the Nigerian and global online job markets deeply. Ask me 5 questions about my skills, interests, and available time - one at a time. Then recommend the 3 fastest realistic ways I could start earning online in the next 30 days, ranked by how quickly I can start, with the first step for each.

WHY IT WORKS: It forces the AI to learn about YOU before advising - the difference between generic tips and a personal plan.

2 - The Fiverr Gig Builder

You are a top-rated Fiverr seller. Write a complete Fiverr gig for [YOUR SERVICE]: an attention-grabbing title, 3 pricing tiers with exactly what each includes, a keyword-rich description that sounds human, and 5 search tags buyers actually type.

WHY IT WORKS: A professional gig setup is the #1 thing separating freelancers who get orders from those who never do.

3 - The Client Magnet DM

Write a short, friendly WhatsApp message I can send to a small business owner offering to [SERVICE - e.g. redesign their flyers]. It must mention one specific thing I noticed about their business: [WHAT YOU NOTICED], offer one free sample, and end with an easy yes-or-no question. No desperate energy.

WHY IT WORKS: Local businesses are the most overlooked source of first clients - and almost nobody messages them properly.

4 - The Proposal That Wins

You are a freelance proposal expert. Here is a job post: [PASTE JOB POST]. Write a proposal that opens with their problem in their own words, presents my fix in 3 short steps, includes one credibility line about me: [YOUR EXPERIENCE], and ends with a small easy next step. Under 150 words.

WHY IT WORKS: Most proposals talk about the freelancer. Winning ones talk about the client's problem. This forces the right structure.

5 - The Price Defender

A client says my price of [AMOUNT] for [SERVICE] is too high. Write 3 polite responses: one that holds my price firmly with justification, one that offers a smaller package instead of a discount, and one that walks away gracefully but leaves the door open.

WHY IT WORKS: Never negotiate emotional and unprepared again - you will have three professional exits ready.

CONTENT THAT GROWS YOUR PAGE

Prompts 6-10 - Ideas, hooks, scripts, captions

6 - 30 Days of Content in 5 Minutes

> You are a social media strategist for [YOUR NICHE]. Generate 30 content ideas for [PLATFORM]: 10 educational, 10 entertaining, 5 personal story, 5 promotional. For each one give me a scroll-stopping hook line and a one-sentence description of the content.

WHY IT WORKS: Running out of ideas is why most pages die. This kills that problem for a full month in one prompt.

7 - The Viral Hook Machine

> Here is my video topic: [TOPIC]. Write 10 different opening hook lines, each under 12 words, that would stop someone mid-scroll. Mix curiosity, bold claims, questions, and mild controversy. Then rank them from strongest to weakest and explain the #1.

WHY IT WORKS: The first 3 seconds decide everything. Ten tested options beats hoping your first idea works.

8 - The Faceless Video Script

> Write a 60-second faceless video script about [TOPIC] for TikTok. Structure: shocking hook (first 3 seconds), the promise (5 seconds), 3 rapid value points, and a call to action to [WHAT YOU WANT THEM TO DO]. Write it exactly as it should be spoken - conversational, energetic, natural Nigerian English.

WHY IT WORKS: Paste the result into an AI voice tool and you have a complete faceless video - no camera, no showing your face.

9 - The Caption Converter

> Turn this idea into 3 different Instagram captions: [YOUR IDEA]. Version 1: short and punchy. Version 2: storytelling style that pulls people in. Version 3: strong call-to-action focused. Add hashtags - a mix of big and niche ones.

WHY IT WORKS: One idea becomes three posts. Test which style your audience responds to and double down.

10 - The Comment Miner

> Here are real comments and questions from my audience: [PASTE COMMENTS]. Identify the 5 most common pain points hiding in them, and turn each into a content idea with a hook that uses the audience's own exact words.

WHY IT WORKS: Content built from your audience's literal words always outperforms - they feel you are reading their mind.

BUSINESS OWNER POWER MOVES

Prompts 11-15 - Offers, sales, follow-up, competition

11 - The Business Doctor

You are an experienced small business consultant. Ask me 7 diagnostic questions about my business, one at a time, waiting for each answer. Then give me: my 3 biggest problems ranked by damage, the ONE change with the fastest payoff, and a 30-day fix-it plan.

WHY IT WORKS: A consultation like this costs serious money. The one-question-at-a-time format makes the diagnosis actually accurate.

12 - The Irresistible Offer Builder

Help me package my [PRODUCT/SERVICE] into an irresistible offer. Give me: 3 name options, a price-anchoring structure, 2 bonuses that cost me little but feel valuable to the buyer, honest urgency (no fake scarcity), and a one-paragraph pitch I can say or post.

WHY IT WORKS: People rarely buy products - they buy offers. Same product, better packaging, more sales.

13 - The WhatsApp Sales Closer

A customer asked about my [PRODUCT], heard the price [AMOUNT], and went quiet. Write 3 follow-up messages spaced over 5 days: message 1 adds value with zero pressure, message 2 handles the price objection with a payment plan or bonus, message 3 is a final friendly close. Warm tone, not robotic.

WHY IT WORKS: Most sales die in silence after the price message. A follow-up sequence recovers a shocking number of them.

14 - The Flyer Copy Machine

Write the text for a promotional flyer for [BUSINESS/OFFER]: a headline under 8 words, 3 benefit bullets (benefits, not features), one trust line, and a call to action with my WhatsApp number. Premium tone - confident, not desperate. Then give me a second version with a completely different angle.

WHY IT WORKS: Design tools make it pretty; this makes it SELL. Copy is what most flyers get wrong.

15 - The Competitor X-Ray

> Here is what my main competitor offers: [DESCRIBE THEIRS]. Here is mine: [DESCRIBE YOURS]. Compare us brutally honestly. What are they doing better? What is my unfair advantage? Give me 3 concrete ways to stand out WITHOUT lowering my price.

WHY IT WORKS: The "without lowering my price" rule forces real strategy instead of a race to the bottom.

PERSONAL PRODUCTIVITY

Prompts 16-20 - Planning, writing, decisions, meetings

16 - The Week Untangler

> Here is everything currently on my plate: [BRAIN DUMP - just type it all messily]. Organize it into a realistic weekly plan: rank by importance and deadline, group similar tasks together, tell me honestly what to delegate or drop, and schedule the 3 most important things into specific time blocks.

WHY IT WORKS: Dumping the mess out of your head and letting AI structure it is an instant stress-killer.

17 - The Message Ghostwriter

> Write a [professional / friendly / firm] reply to this message: [PASTE MESSAGE]. My goal is [WHAT YOU WANT TO HAPPEN]. Keep it under 120 words and make me sound confident and gracious at the same time.

WHY IT WORKS: The messages you dread writing get handled in 30 seconds, and they read better than what stress produces.

18 - The Decision Maker

> I am deciding between [OPTION A] and [OPTION B]. First interview me: ask 5 questions to understand my real situation. Then give an honest recommendation: pros and cons of each, the biggest risk of each, and what you would do in my shoes and why.

WHY IT WORKS: It stops the AI guessing at your context and gives you a structured second brain for big choices.

19 - The Meeting Weapon

> I have a meeting/negotiation about [TOPIC] with [WHO]. Prepare me fully: the 5 questions they are most likely to ask with strong answers, 3 smart questions I should ask them, my strongest talking points, and my weakest point - with exactly how to defend it.

WHY IT WORKS: Walking in over-prepared changes how people treat you. This takes 2 minutes to generate.

20 - The Contract Digester

> Summarize this document in 3 levels: one sentence, then five bullets, then a detailed breakdown of anything involving money, deadlines, or obligations on my side: [PASTE DOCUMENT]. Flag anything unusual, one-sided, or risky that I should question before signing.

WHY IT WORKS: Never sign something you only half-read again. The risk-flagging alone can save you real money.

LEARN & LEVEL UP

Prompts 21-25 - A free personal tutor for anything

21 - The Personal Tutor

> You are my personal tutor for [SKILL]. First assess my current level with 5 questions. Then create a 30-day learning plan: daily 20-minute lessons, weekly practice challenges, and a quiz every 7 days. Teach me lesson 1 right now.

WHY IT WORKS: Personalized teaching was always the expensive part of education. Now it is free and infinitely patient.

22 - The Explain-It-Simple

> Explain [CONCEPT] to me three times: first like I am 12 years old, then like a smart adult beginner, then like a professional in the field. Use Nigerian examples and comparisons where possible.

WHY IT WORKS: Climbing the three levels builds real understanding instead of memorized definitions.

23 - The Skill Gap Analyzer

> I want to become [GOAL - e.g. a paid social media manager] within [TIMEFRAME]. Ask me about my current skills and experience. Then list the exact gaps between where I am and where I need to be, ordered by priority, with a free resource for closing each gap.

WHY IT WORKS: A map of exactly what to learn, in what order - instead of drowning in random YouTube tutorials.

24 - The Interview Coach

> You are a tough but fair interviewer for a [ROLE] position at a company like [COMPANY TYPE]. Interview me one question at a time. After each answer, score it out of 10, tell me what a top candidate would have said, then continue. Full debrief at the end.

WHY IT WORKS: Unlimited realistic interview practice with instant coaching - before the interview that counts.

25 - The Book Squeezer

> Teach me the 10 most important ideas from the book [TITLE] as if you are teaching me personally, with one real-life action step for each idea. Then tell me which ONE idea would change things fastest in my specific situation: [YOUR SITUATION].

WHY IT WORKS: The value of a book in 10 minutes, converted into actions instead of highlights you never look at again.

THE SECRET WEAPONS

Prompts 26-30 - Meta-prompts that upgrade every other prompt

26 - The Interview-Me Trick

> Before you answer my next request, ask me 5 questions that would help you give me a world-class result. Then answer using my responses.

WHY IT WORKS: The single biggest quality upgrade in AI. It flips the hard work of giving context onto the AI itself.

27 - The Harsh Critic

> Here is my [WORK / PLAN / CONTENT]: [PASTE IT]. Act as my harshest honest critic. What is weak, what is confusing, what would make someone scroll past or say no? Be specific and merciless. Then rewrite it, fixing everything you criticized.

WHY IT WORKS: Free brutal feedback plus the fixed version - the fastest editing loop that exists.

28 - The Expert Panel

> Answer my question from 3 expert perspectives: a marketer, an accountant, and a skeptical customer. Question: [YOUR QUESTION]. Then combine their three views into one balanced final recommendation.

WHY IT WORKS: One brain gives you one angle. A panel exposes the blind spots before reality does.

29 - The Prompt Improver

> Here is a prompt I want to use: [PASTE ANY PROMPT]. Rewrite it to get a dramatically better result - add the role, context, and format instructions it is missing. Show me the improved version, then explain what you changed and why.

WHY IT WORKS: The AI is the best prompt engineer alive. Use it to sharpen every prompt in this pack for your exact situation.

30 - The Polish Formula

After ANY answer the AI gives you, send these three follow-ups in order: "Make it punchier." Then: "Make it sound the way real people actually talk." Then: "Cut it by half without losing the message."

WHY IT WORKS: Three rounds of polish beats any single perfect prompt. This is how professionals finish everything.

This is 1% of what is possible.

These prompts make you faster. But prompts alone do not change your life - systems do: income skills, automated funnels, and a plan.

THE AI LIFE UPGRADE

The complete step-by-step course: 6 modules, 18 lessons - the tools, two income skills, and your own automated business.

Watch the free training to learn more.
