15 AI WORKFLOWS FOR BUSINESS OWNERS

15 things you can put on autopilot with AI -
so your business runs while you don't

Pick one, set it up this week, and never do that task by
hand again.

Start with number 1 - it saves the most time.

From Bambi - The AI Life Upgrade

THE 15 WORKFLOWS

1. Instant customer-question replies

An AI assistant trained on your prices, hours and delivery answers "how much?", "where?", "do you deliver?" automatically.

How: Set up a Claude Project / Custom GPT with your business info.

2. Lead follow-up on autopilot

People who enquire but don't buy get a friendly series of reminder messages over a few days.

How: A scheduler or email tool + AI-written messages.

3. Review & testimonial requests

After every purchase, a message automatically asks the happy customer for a review.

How: Auto-message on WhatsApp Business or email.

4. Content that posts itself

Batch a whole month of posts in one sitting, then schedule them to go out on their own.

How: Meta Business Suite / TikTok scheduler + AI captions.

5. Appointment & order reminders

Customers get an automatic nudge before their booking, or to finish an unpaid order.

How: WhatsApp Business quick replies / a reminder tool.

6. Your weekly numbers, summarised

Your sales and key numbers land in one simple weekly summary you actually read.

How: AI + a spreadsheet it builds for you.

7. Invoice & payment reminders

Unpaid invoices get a polite automatic reminder so you chase less.

How: Invoicing app auto-reminders + AI wording.

8. Draft-all-my-messages

AI drafts replies to your emails and DMs; you just read, tweak and send.

How: Paste the message into AI with your goal.

9. New-customer welcome sequence

Every new buyer gets a warm welcome and "what happens next" automatically.

How: Auto-email/WhatsApp on purchase.

10. Social DM auto-replies

Common questions on Instagram / WhatsApp Business get an instant reply, day or night.

How: Built-in auto-reply / quick replies.

11. One idea into a week of content

Give AI a single idea; it returns a week of captions, posts and a video script.

How: One Claude/ChatGPT prompt.

12. Meeting & negotiation prep

Before any important call, AI hands you the likely questions and strong answers.

How: Prep prompt in Claude/ChatGPT.

13. Feedback collection

After a sale, a one-question survey goes out and AI summarises what people say.

How: Simple form + AI summary.

14. Price-list & catalogue in minutes

AI reformats your product list into flyers, posts and a clean catalogue.

How: Canva + AI copy.

15. Competitor & trend watch

Each morning, an automatic AI check tells you what's trending in your niche.

How: Grok / scheduled AI task.

15 tasks. Off your plate.
